Student Name: Aaron John C. Demakiling
Group: NeOS
Role: CLI Developer

What did I contribute to the project?
- I built the command prompt and the command processing logic. I also made the help, clear, and exit commands.

What features did I personally develop?
- command prompt, command processing as well as help, clear, and exit commands.

What problems did I encounter?
- empty input and extra spaces that caused errors.

How did I solve those problems?
- I made the program skip blank input and remove extra spaces.

What did I learn from this project?
- I learned how a command-line interpreter works and how to validate user input.

Evidence of my contribution?
- I wrote the code for command prompt and command processing as well as the help, clear and exit commands which can be seen in our group's GitHub repository.
